ARTI RAI, ELVIN R. LATTY PROFESSOR OF LAW AT DUKE UNIVERSITY, is an internationally recognized expert in intellectual property law, administrative law, and health policy. Her research on IP law and policy in biotechnology, pharmaceuticals, and software has been funded by NIH and the Kauffman Foundation, and she has published over 50 articles, essays, and book chapters. From 2009 to 2010, Rai served as the Administrator of the Office of External Affairs at the U.S. Patent and Trademark Office (USPTO), where she led policy analysis of patent reform legislation that ultimately became the America Invents Act and worked to establish the USPTO’s Office of the Chief Economist.

MARK H. WEBBINK IS A DUKE LAW SENIOR LECTURING FELLOW and recently served as executive director of the Center for Patent Innovations at New York Law School. He is the former deputy general counsel for intellectual property at Red Hat, where he developed groundbreaking intellectual property practices, including Red Hat’s Patent Promise and the legal foundations for Red Hat’s subscription model for open source software. He has written and spoken extensively on open source software, software patents, and patent reform and has testified before the U.S. House of Representatives Subcommittee and the Federal Trade Commission.

KENNETH SIBLEY IS A PARTNER AT MYERS, BIGEL, SIBLEY AND SAJOVEC and a Senior Lecturing Fellow at Duke University School of Law, where he teaches advanced patent law and patent claim drafting. He is registered to practice before the USPTO and is an associate member of the Association of University Technology Managers and a member of the American Intellectual Property Law Association. He has counseled clients in broad areas of biomedical device, chemical and pharmaceutical technology, as well as agricultural and medical biotechnology.

TOM IRVING IS A PARTNER AT FINNEGAN, HENDERSON and has 36 years of experience in the field of intellectual property law in Finnegan’s D.C. and Belgian offices. His practice includes due diligence, patent prosecution, reissue and reexamination, patent interferences, and counseling, including prelitigation, Orange Book listings of patents covering FDA-approved drugs, and infringement, enforceability, and validity analysis in the chemical/pharmaceutical fields, as well as litigation. He has been lead counsel in numerous patent interferences, reissues, and reexaminations and has served as an expert witness in patent litigation.

BARI FAIACO IS A PARTNER AT FOLEY HOAG LLP and specializes in complex intellectual property and patent litigation matters. Her technology-related practice focuses on the biomedical field, including counsel to companies with activities focusing on recombinant DNA, monoclonal antibodies, small molecule compounds, drug delivery, molecular diagnostics, and medical devices. She represents clients in contract disputes and commercial litigation and has successfully defended pharmaceutical and life sciences clients in significant patent infringement lawsuits.
THE DUKE LAW CENTER FOR JUDICIAL STUDIES, in association with the AMERICAN INTELLECTUAL PROPERTY LAW ASSOCIATION, is holding a one-week intensive training program that will address important developments in patent law. Designed for practicing lawyers and leaders whose work requires a deep understanding of the fast-moving area of patent law, this program focuses on practical strategies for navigating the new procedures set out in the America Invents Act. Participants also will develop a comprehensive understanding of the case law that is shaping patent and intellectual property litigation. The faculty includes Duke Law scholars, legislative and executive branch officials, experienced lawyers, and prominent United States judges — a unique combination of knowledge, insight, and experience that distinguishes this accelerated learning program from traditional educational programs. Topics include:

- **AIA: Policy rationale, major provisions, and legislative history**
- **Recent case law developments in patent validity: impact on prosecution, licensing, and litigation**
- **Claim construction, infringement, and remedies**
- **Patents, licensing, standards, and antitrust, including treatment of reverse payment settlements**
